CYBER SCIENCE CAMP

SPORE PRINT ART

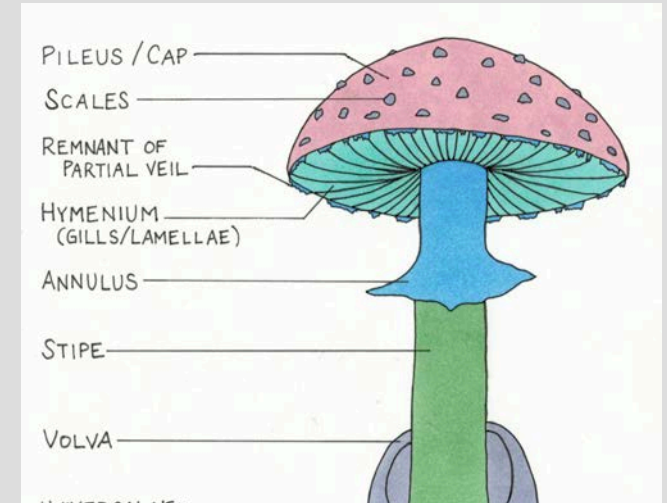

CAN YOU GUESS WHAT COLOR SPORES THIS MUSHROOM HAS?

- After a rain storm or at other times when conditions are damp, hunt for mushrooms.
- Collect 3 of the same type. You will be placing them gill-side down on colored construction paper to collect the spores.

SPORE PRINT ART

- Separate the cap (pileus) from the stalk (annulus + stipe).
- Place the colored paper in a box, set the cap on top of the paper, gill-side down.

SPORE PRINT ART

- Place lid on box & let is set for 24hr.
- Remove & reveal your work of art & the spore color!
- Spores can then be used to learn more about each type of mushroom, and to identify the species.
